¹ Categories include data for funds that invest primarily in other funds.

² Net new cash flow is the dollar value of new sales minus redemptions combined with net exchanges.

³ New sales are the dollar value of new purchases of mutual fund shares. This does not include shares purchased through reinvestment of dividends in existing accounts.

⁴ Exchange sales are the dollar value of mutual fund shares switched into funds within the same fund group.

⁵ Regular redemptions are the dollar value of shareholder liquidation of mutual fund shares.

⁶ Exchange redemptions are the dollar value of mutual fund shares switched out of funds and into other funds within the same fund group.

⁷ A target date fund is designed to satisfy investors' investment objective by a particular target date, which is usually included in the name of the fund. These funds invest in a mix of asset classes and typically rebalance their portfolios to become more conservative and income producing as the fund approaches and passes its target date.

⁸ A lifestyle fund maintains a predetermined risk level and generally use words such as "conservative," "moderate," or "aggressive" in their names to indicate the fund's risk level. Note: Components may not add to the total because of rounding.
